EDUCATION

University of Science - VNUHCM
October 2024 - Now

B.Sc. in Computer Science - APCS

- **GPA**: 3.9/4.0

PROFESSIONAL EXPERIENCE

Internet Archive
May 2026 - August 2026

Open Library Engineering Fellow — *Remote*

- Led the end-to-end development of a **site-wide book filter** for Open Library, later extended to carousel filters by **subject tags**.
- Built with Python (web.py) and Solr queries across **20M+ records** and reusable Lit components, persisting preferences through **localStorage** and **cookies** and covering the filter logic with **unit tests**.

Green Ocean Group JSC
September 2026 - Now

Software Engineer — *HCMC, Vietnam*

- Developed an internal crew management platform with a Zalo Mini App and a web HR portal, replacing manual data entry for **500+ crewmen**.
- Led **UI/UX design and frontend development** across both interfaces and designed the **PostgreSQL database schema.**

Critical Thinking – CM102
October 2025 - Now

Teaching Assistant — *HCMC, Vietnam*

- Mentor **85+ students**, tracking progress and reviewing work on two course projects (Turning Point project and final film project).
- **Collaborate** with the Professor and TA team to **design, test, and refine** instructional strategies and class exercises that improve student engagement and learning outcomes.

RESEARCH PAPERS

1. [ACOMPA'26] *SAGE-Yoga: Multi-Cue Learning for Yoga Pose Classification and Joint-Level Correction | [Arxiv]*
   Hung Le Chi, **Khanh-Minh Huynh**, Tan-Phuc Huynh, Long-Nghia Tran, Trong-Thuan Nguyen, Minh-Triet Tran

PROJECTS

The Sunny Project [Devpost] | *Python, Gemini 3 API, Windows Speech Recognition, Google TTS, pygame*

- Built a **voice-first research assistant** that captures the active screen and analyzes papers with **Gemini vision**.
- Implemented **Gemini function calling** for paper analysis, claim verification, code extraction, and code execution with automatic error diagnosis and retry.
- Developed **screen-change detection** using image similarity hashing and a **queue-based background pipeline** for non-blocking experiment runs.

Hallo [Devpost] | *React Native, Expo, TypeScript, MongoDB*

- Built an **elderly-care application** with medication tracking, emergency handling, and family connectivity, targeting Alzheimer's patients.
- Integrated **OpenRouter AI API with 10+ endpoints** to implement an intelligent chatbot system providing emotional support and care assistance tailored to elderly users' needs.
- Designed **MongoDB storage** for medication data and a real-time family dashboard.

Worldy [Project Link] | *Flask, MongoDB, JavaScript, Leaflet.js, Google OAuth*

- Built a full-stack social mapping platform enabling users to **share life experiences through location-based blogging**, connecting memories to an interactive global map with photo uploads via Cloudinary integration.
- Implemented **Google OAuth authentication** and comprehensive relationship management system, allowing users to send/accept friend requests and filter map content by social connections.
- Engineered **interactive map visualization** using Leaflet.js and Nominatim API, featuring location search autocomplete, click-to-pin functionality, and responsive design.

TECHNICAL SKILLS

General: Python, JavaScript, TypeScript, C/C++, Docker, Git, GitHub, Figma, Bash, Postman
Web Development: HTML/CSS, React.js, Bootstrap, REST APIs, Node.js
Database: SQLite, SQL, MongoDB, Firebase, PostgreSQL, Solr
AI/ML: PyTorch, FastAPI, NumPy, Pandas, MediaPipe
